Johnson Controls (with Liebert HVAC)	\$162,903.00
United Building Construction	\$165,900.00
Shufelberger Construction	\$178,000.00

SHASCOM is currently in the process of inspecting the bid packages for completeness and compliance with specifications.

SHASCOM will be consulting with its architect and his engineer regarding any and all equipment offered in the bid packages as an alternate to the Liebert HVAC systems in order to ascertain their ability to meet specifications. Those systems not meeting specifications, as determined by SHASCOM and/or the engineer will be considered to not meet bid requirements. Since our engineer will be working of examining the specification for any alternate equipment listed, the award of the project will be delayed until his determinations are complete.

Further information will be emailed and posted to our website, including a list of subcontractors.
